SHEDLANDS COMPANY PROFILE

Shedlands was founded 20 years ago. We have grown to become one of the industry leaders in the manufacturing of quality timber garden buildings with outlets throughout the UK.

Having streamlined the business and with new management in place, Shedlands aim to stabilise, rejuvenate and create awareness of the brand once again, having retained all key members of staff. We offer a large range of garden buildings built by our specialised factory workforce who are dedicated to manufacture our buildings to an exceptionally high standard.

The reasons for our success are many and varied - as a family company we have always been able to move quickly to keep abreast of ever changing designs and product improvements.

We have always had an eye for detail and quality of presentation, which gives us a highly competitive edge.

The garden industry in general has grown enormously over the last 20 years and Shedlands have benefited from the interest in making the garden a part of everyday leisure.

While we are always very conscious of the importance of price, we also recognise that buildings have to last many, many years so we never manufacture products of an inferior quality.

Shedlands are a progressive forward thinking company with a genuine interest in environmental issues, we are FSC® certified and using a water based ECO friendly treatment for all our buildings.
